Upon choosing your top playlist you will be met with a modal window that shows you the status of your playlist being processed.

(optional) Enter your instagram username to give others using Spotifyfynd Friends the ability to connect with you.

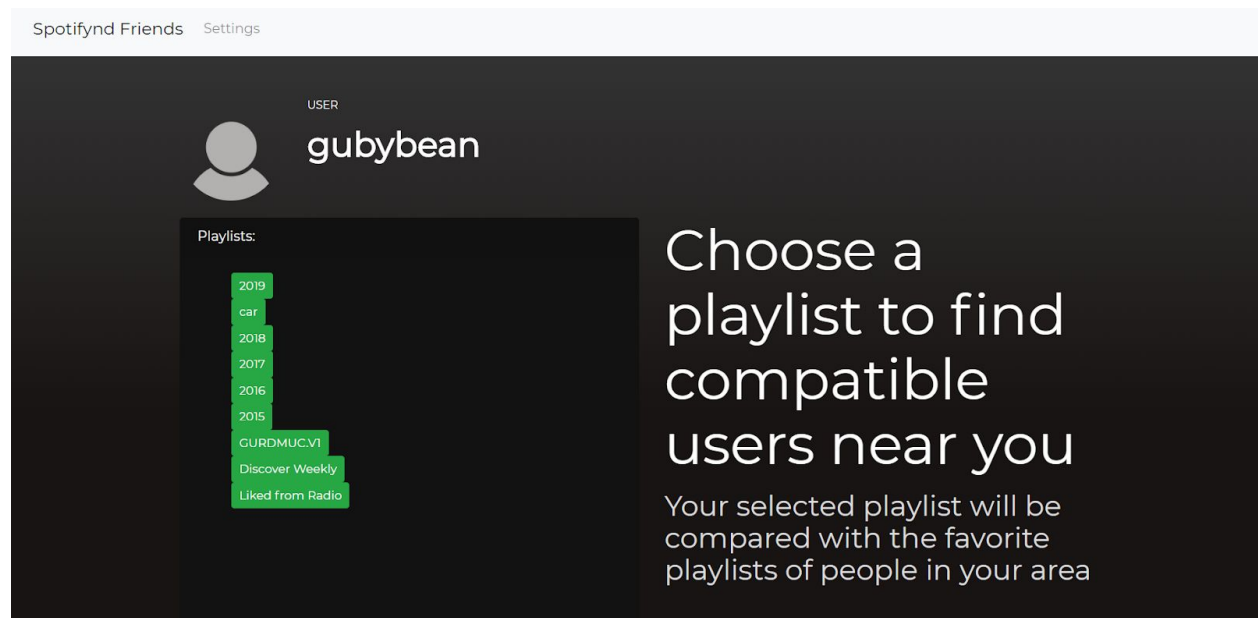

To return to the main Spotifyfynd Friends page you can either press the Spotifyfynd Friends button at the top left of the page.

Spotifyfynd Friends

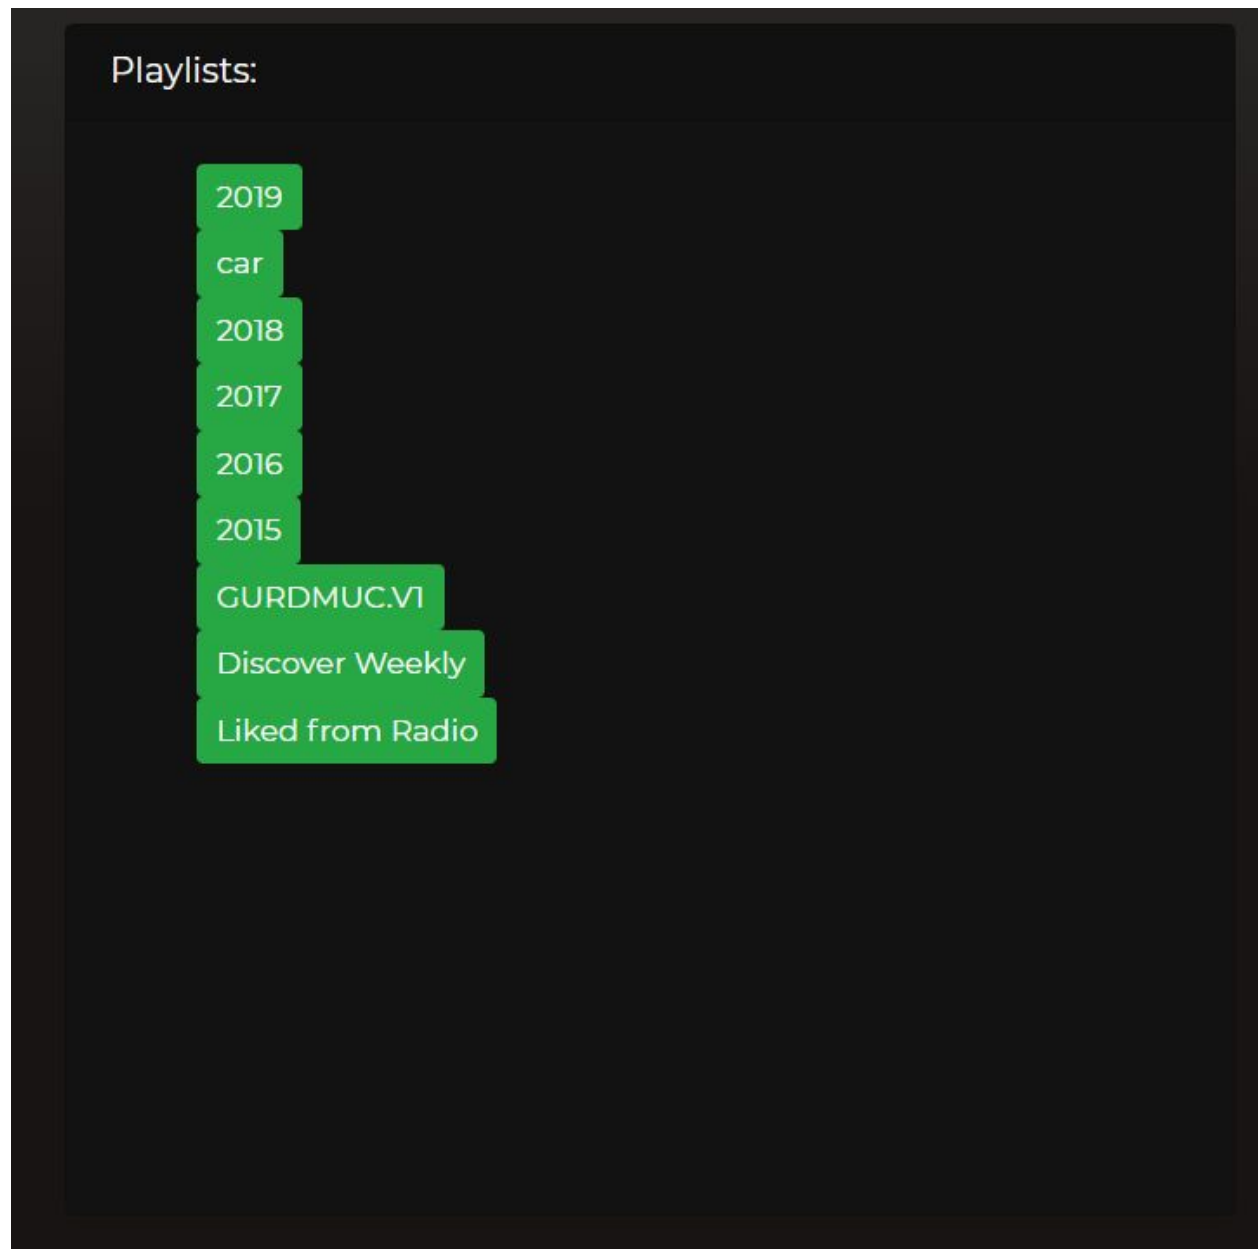

You can also press the Back To Home button underneath the Instagram field to return to the Spotifyfynd Friends main page

Back to Home

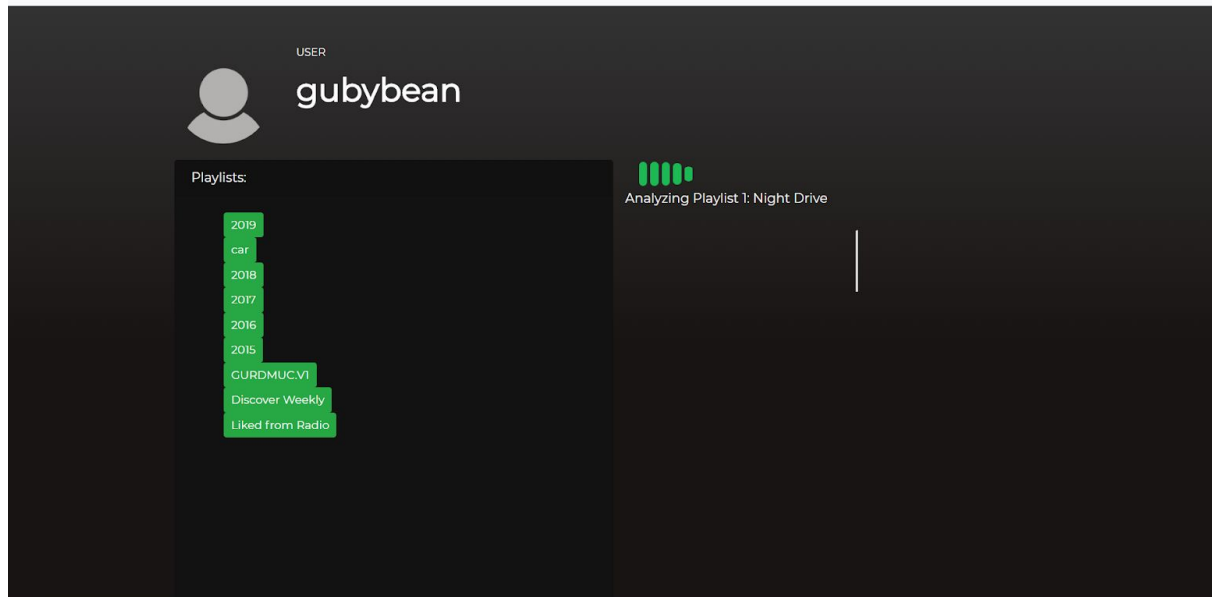

This is the main Spotifyfynd Friends page, it displays a list of your public and private playlists and are only visible to you.

**Step 7 :** To match with others based on your location, choose a playlist to be compared against their top playlists.

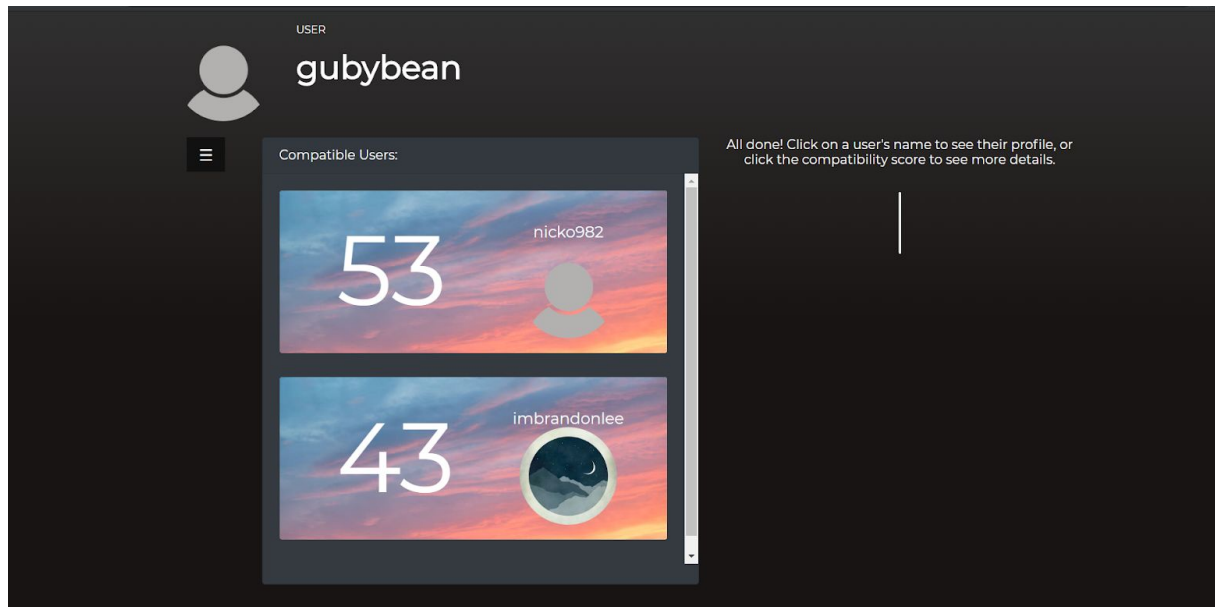

Upon clicking your playlist you will see a loading animation on the right and see all of your playlist songs being processed.

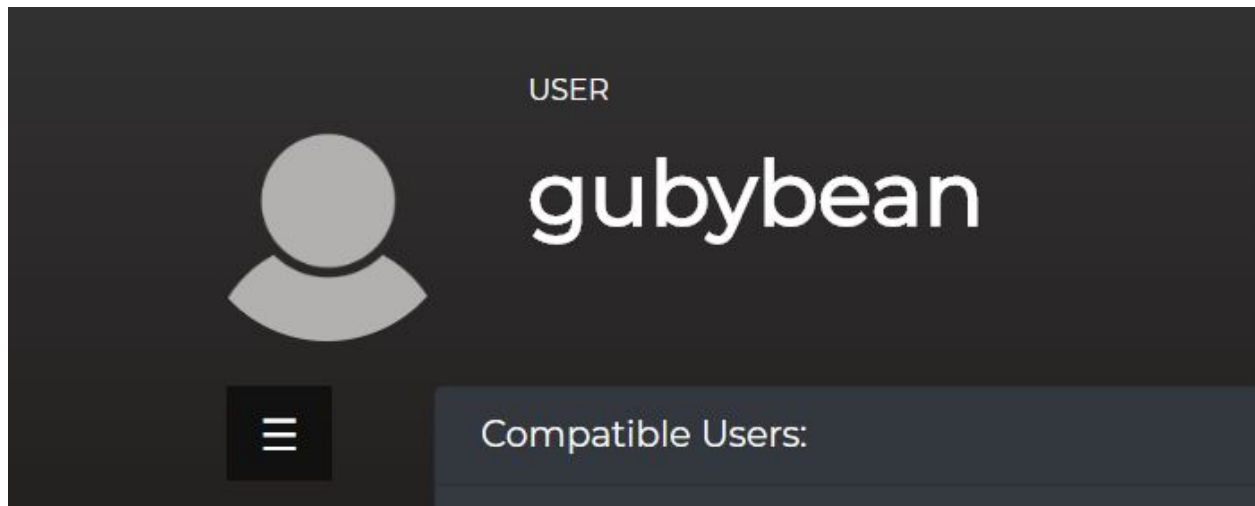

Status of your chosen playlist being analyzed and compared against other users in your chosen area

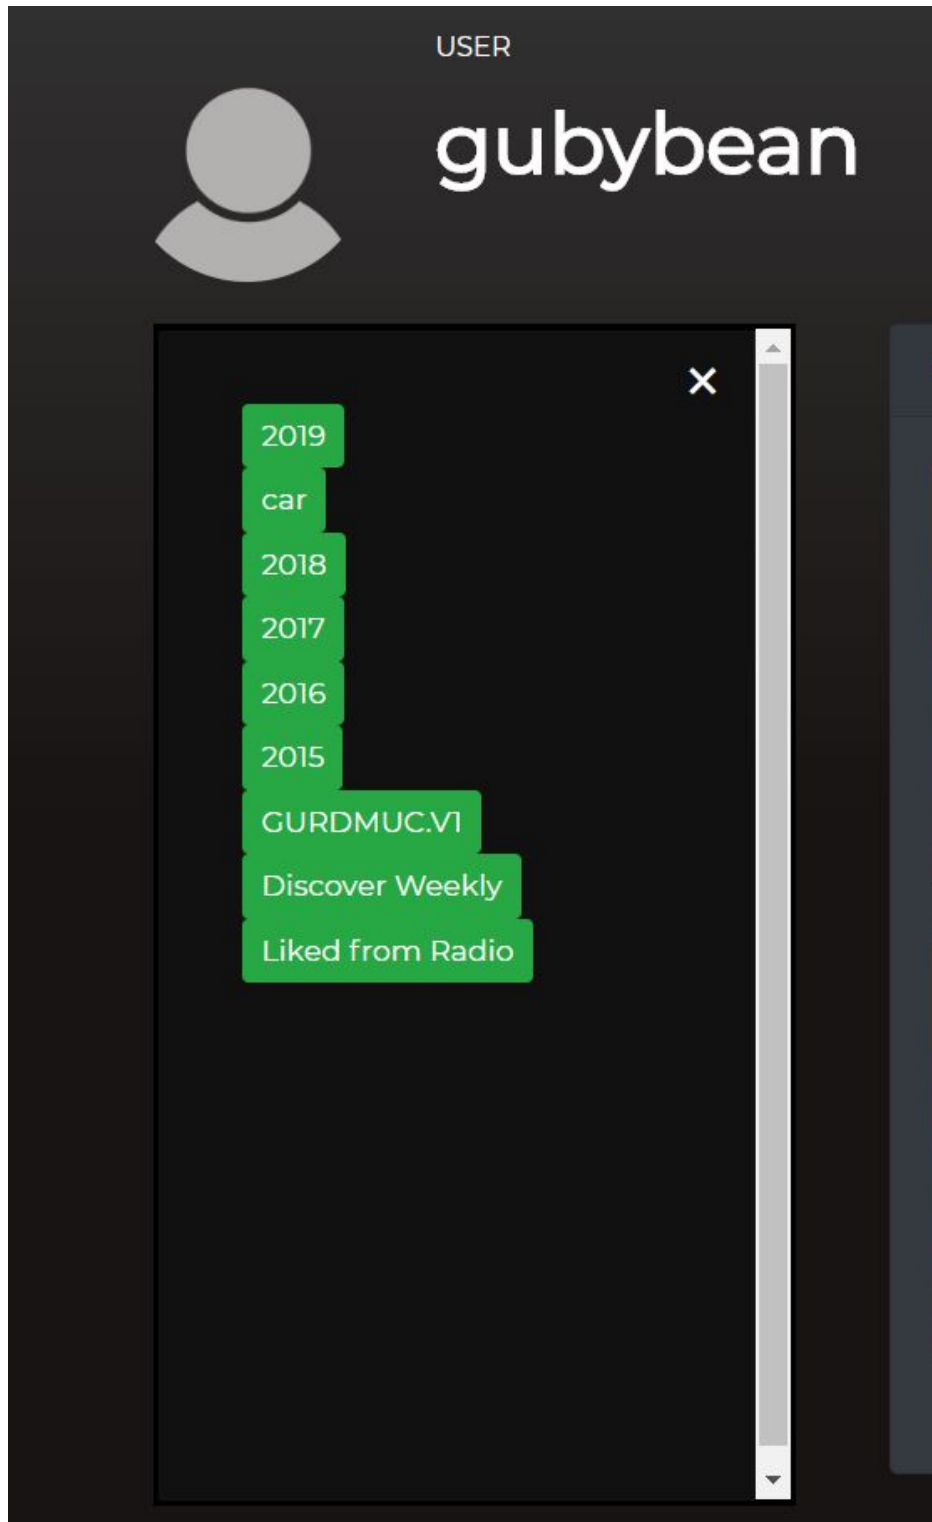

After your playlist is finished being compared against all other users in your area, a list of user cards will appear on the left side of the page.

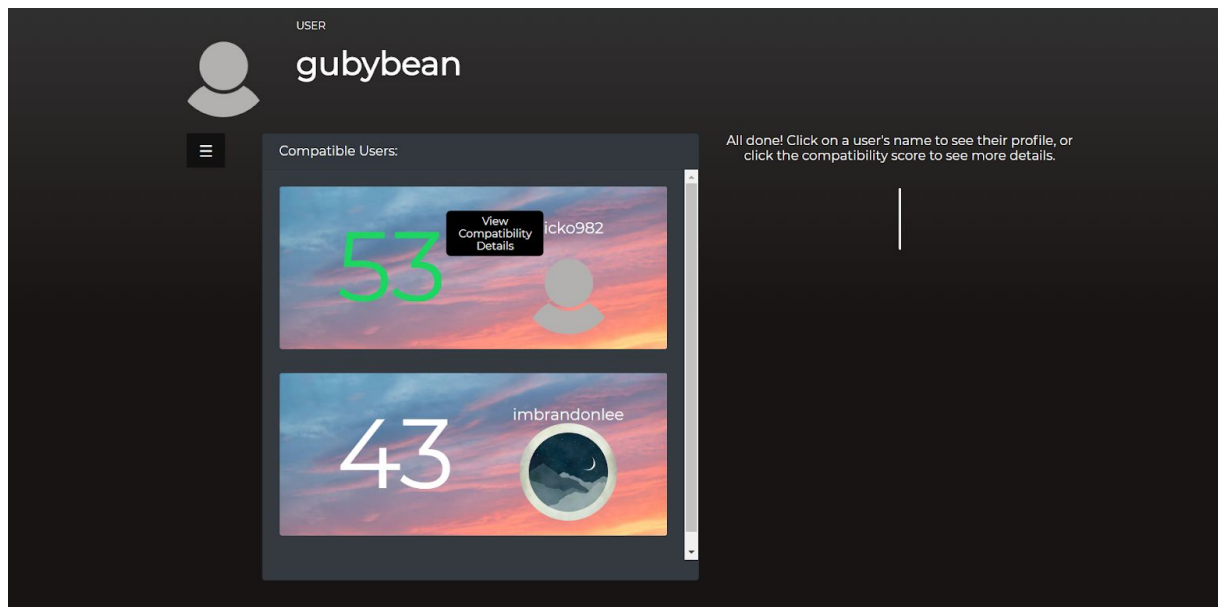

If you wish to choose another playlist for comparison simply press the hamburger icon beneath your user profile image.

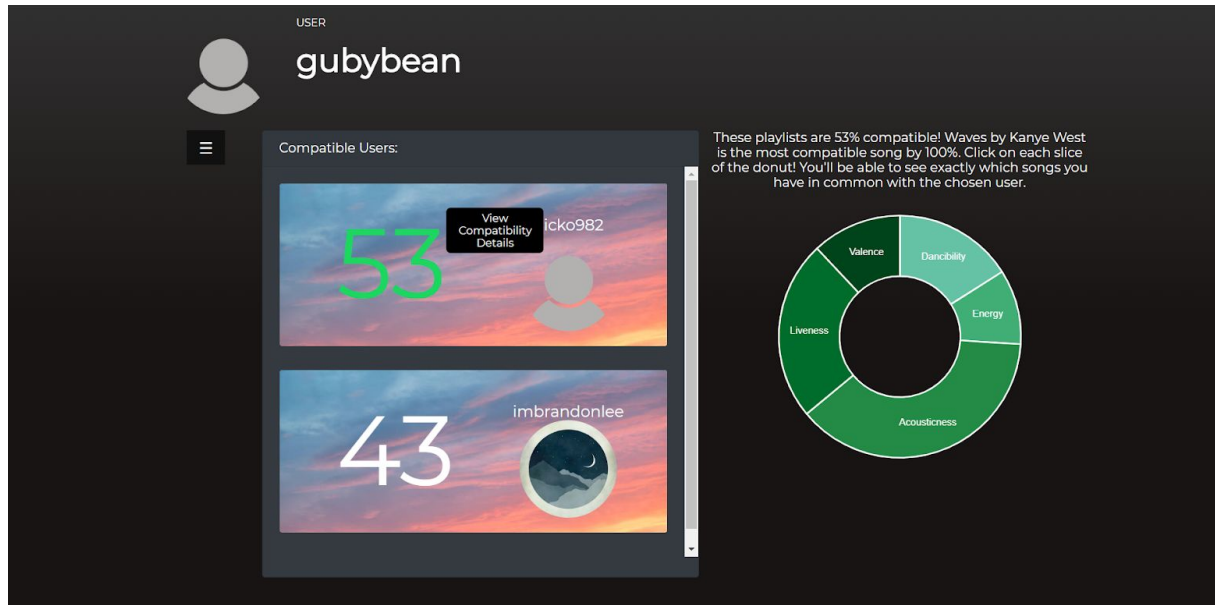

After clicking the hamburger icon, a list of your playlists will appear. Next choose another playlist to generate user cards with different compatibility ratings.

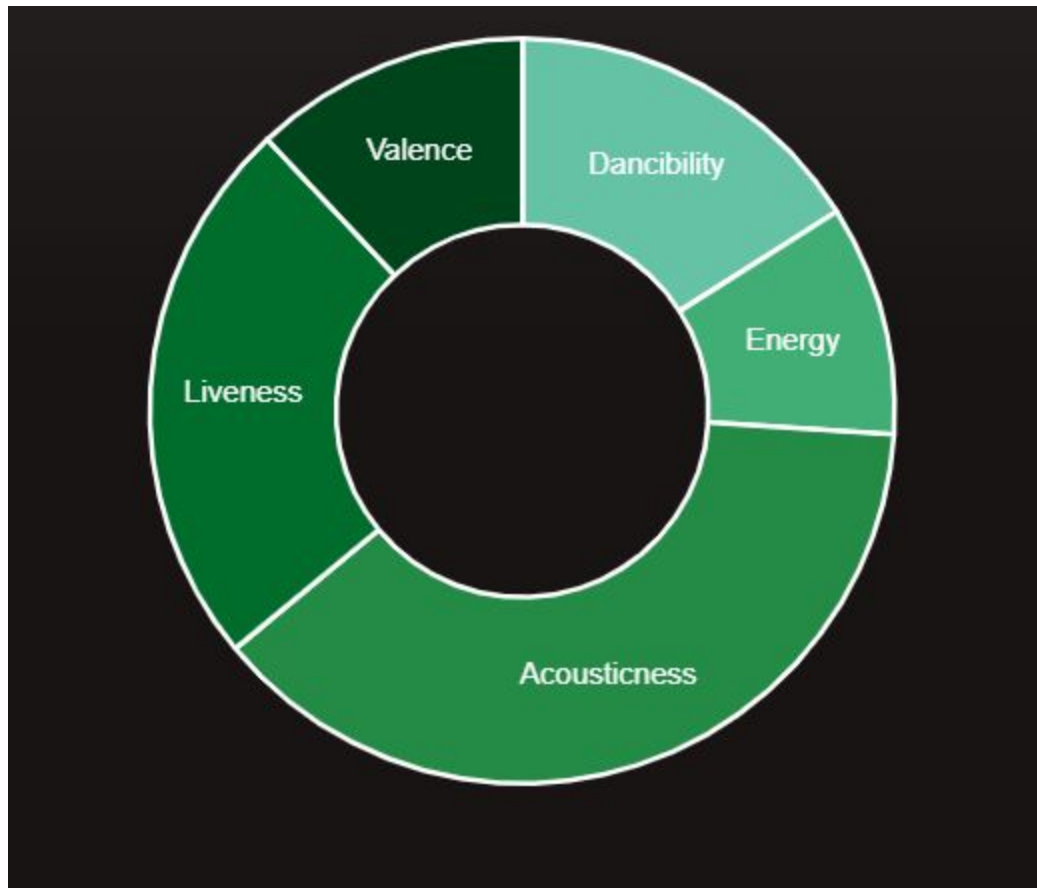

Within the user card there is a large number to the left of the other users username and profile picture. The number represents the compatibility score between your chosen playlist and their top playlist.

After clicking on the compatibility score number, you will see a donut appear on the right side of the page. Above the donut there is a message that shows the overall compatibility score and which song from your playlist had the strongest compatibility with the other users playlist.

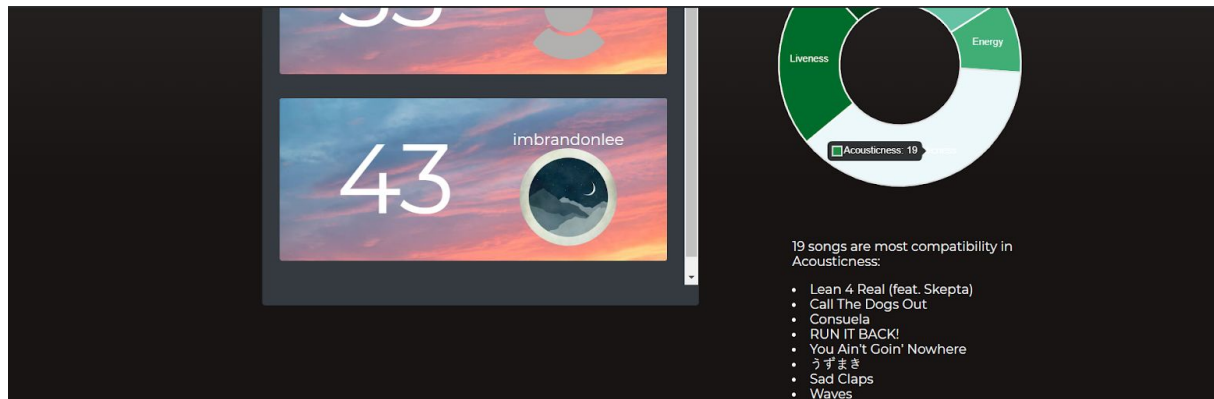

The donut contains attributes which are used to describe the various aspects of a song or composition in Spotify.

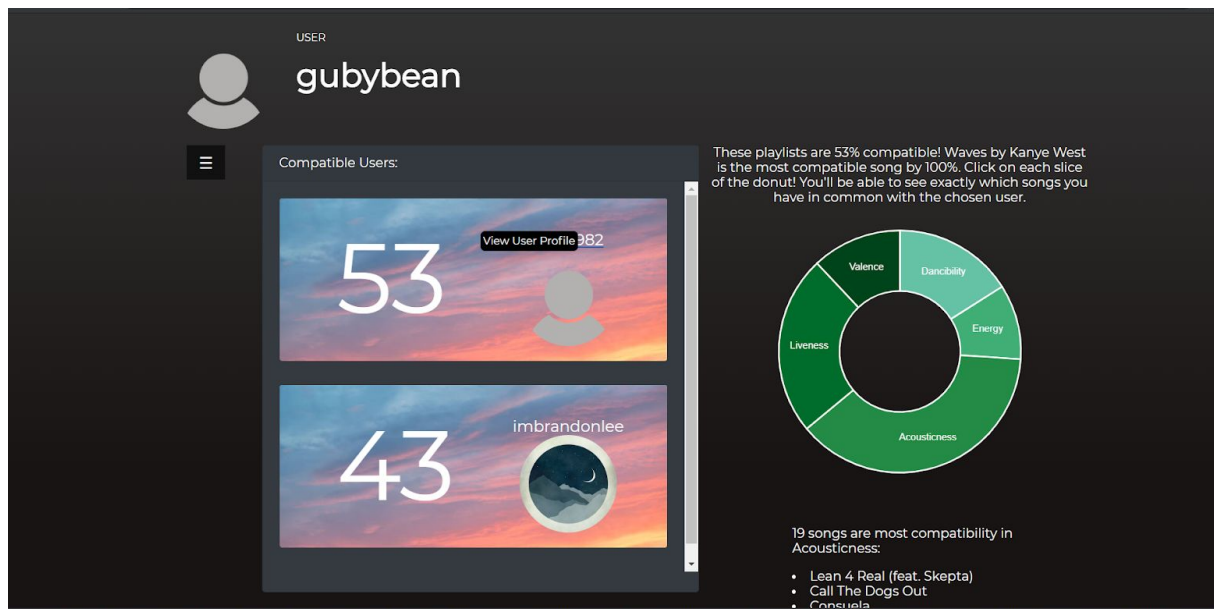

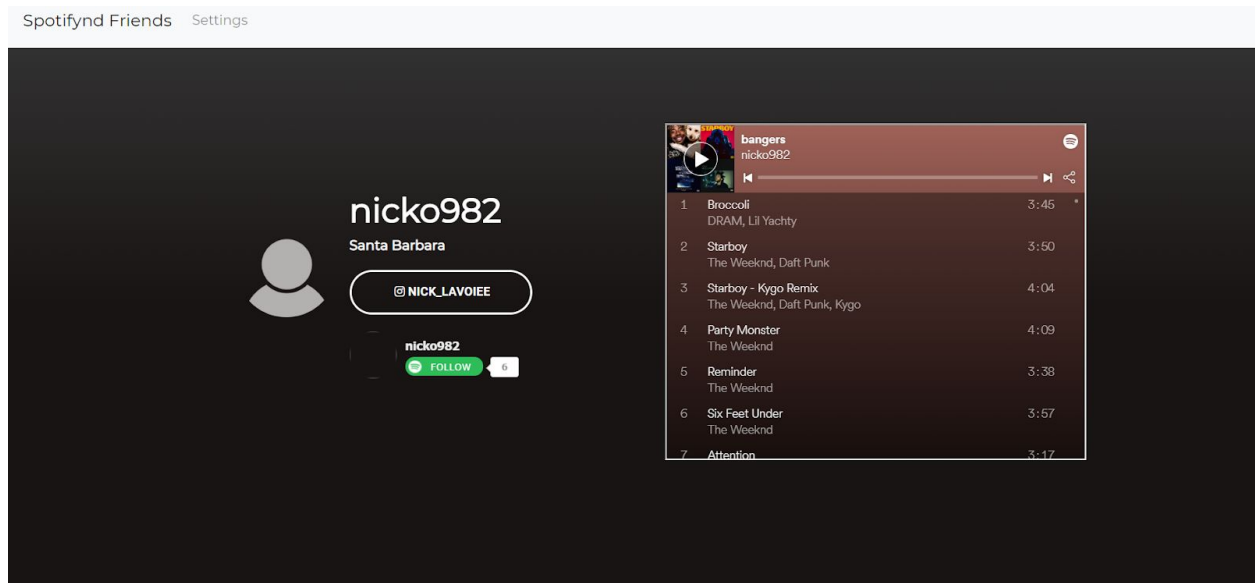

You can click on any of these attributes to see exactly which of your songs had the strongest similarity with the songs in their playlist based on the chosen attribute.

You can click on the other users username and visit their profile page and view more details about them

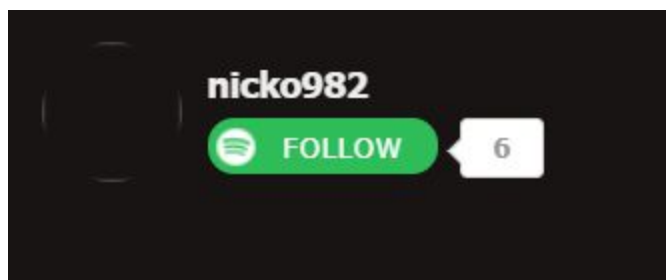

The users profile has details such as their Spotify username, location, and their embedded top playlist.

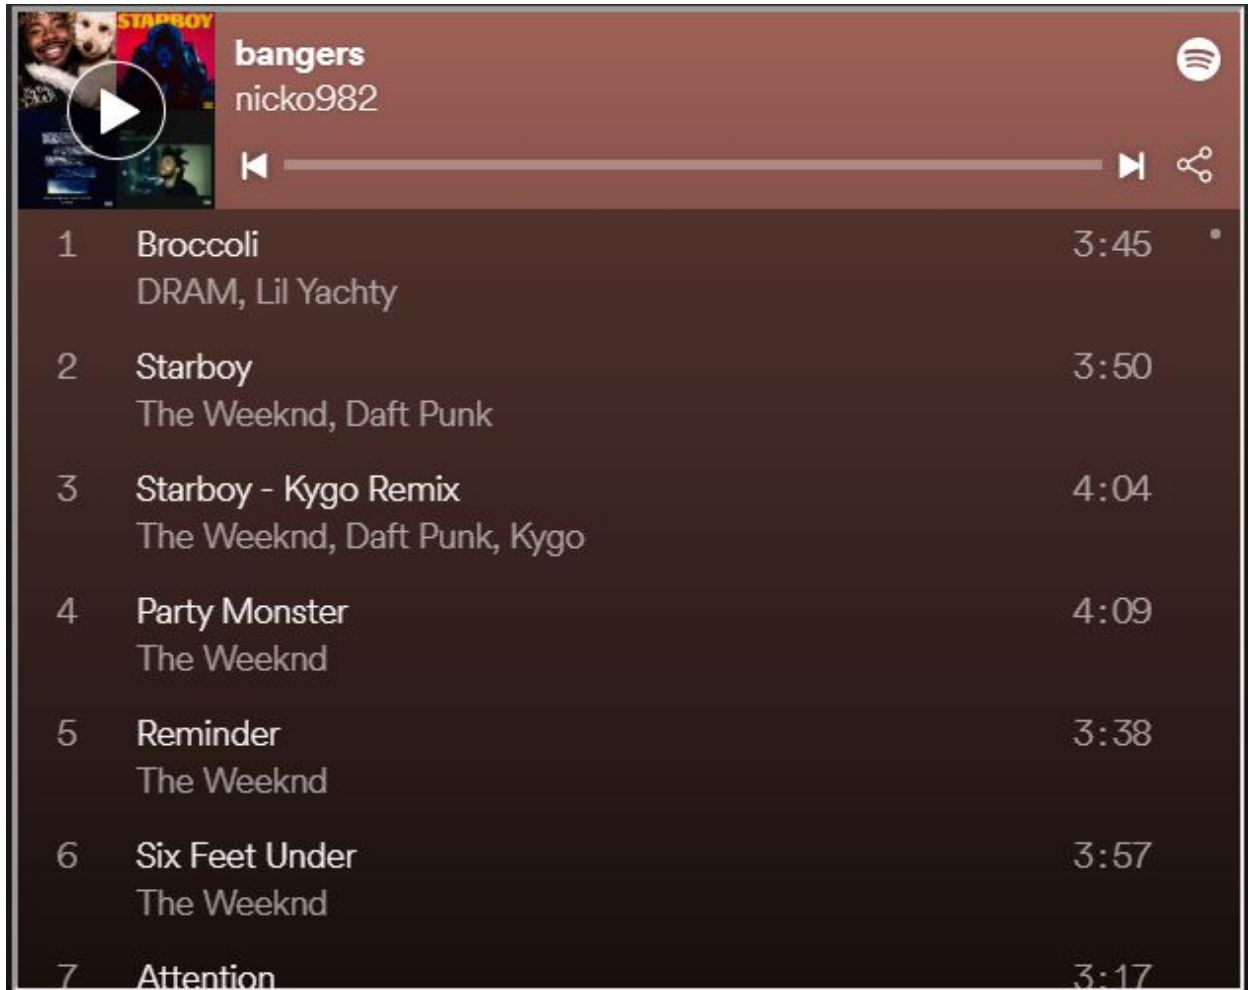

There is a link to their instagram if they entered one in the settings page.

Beneath their instagram profile link button there is another button that says Follow, it will allow your Spotify account to follow their Spotify account. The number next to the follow button is the amount of followers the user has on Spotify.

On the right side of the users profile page there is an embedded playlist. It is the other user's chosen favorite playlist and can be played through your web browser.

The image shows a Spotify playlist interface. At the top, there is a header bar with a play button icon, the playlist title "bangers", and the creator's name "nicko982". Below the header, there is a progress bar with a play/pause button and a share icon. The main content area displays a list of seven songs, each with a number, the song title, the artist(s), and the duration.

Number	Song Title	Artist(s)	Duration
1	Broccoli	DRAM, Lil Yachty	3:45
